AVANTA WORKSHOP CABINETS

Customer

Commercial Premium Car Restyling Workshop

Location - **Leeds**

Installation time - **1 working day**

Avanta UK commented:-

"A great endorsement for the Avanta brand to be working with such a prestigious luxury car brand. The cabinet range was always designed with the commercial workshop in mind and with 75KG capacity shelves and a welded construction these units are built to last."

Client commented: -

"The guys at Avanta were brilliant at getting back to me with the redesigns and revised proposals to suit exactly what we wanted. The fitting team were on site when they said they would be and worked hard to get the job done."

Unit B1, Astra Park, Parkside Lane, Leeds
West Yorkshire, United Kingdom, LS11 5SZ

Working for a prestigious car re-styling brand based in Leeds Avanta UK designed, manufactured and installed a range of bespoke storage cabinets and workbenches to create a showcase workshop area.

The installation included 19 double hinged door steel cabinets (11 floor mounted on plinths & 8 wall mounted cabinets) to creating storage and workspace for the vehicle technicians. The 13.5m run had to accommodate 2x existing mobile Snap On cabinets and 2x 2m workstations with storage underneath.

The cabinets were finished in contrasting mid grey carcass with black doors with flush fitting 'non snag' handles creating a functional and attractive work environment.
